

FALL KICKOFF • WEDNESDAY, SEPTEMBER 9, 2026 •
TSAI CITY

Build the *future* *of AI* at Yale.

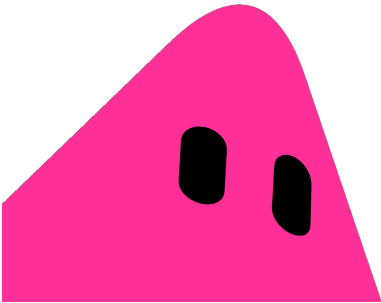

We are the hub for people who build with AI at Yale.

Tonight: the club, a live Grok Bot demo, a month of Cursor Pro for everyone, and a competition with real prizes.

YALE-AI.ORG

Agenda

01	YaleAI: what we are doing this year.	THE BOARD
02	Grok Bot, then a live demo.	SPACEXAI
03	Get Cursor Pro. Scan, redeem, done.	SPACEXAI
04	Rapid-fire Cursor: the competition.	EVERYONE
05	Join the Slack. :)	EVERYONE

PART ONE • YALEAI

We're a club with *real outputs.*

We strive to be much more than another Yale group with your email in their mailing list. **Learn + Build + Collaborate.**

Here's what this year will look like (and how you can get involved!).

Learn + Build + *Collaborate*

01 · LEARN

Start now. *Start here.*

- No experience? No problem. All majors, all skill levels.
- A semester-long fellowship, plus workshops.
- Agents, AI-native workflows, mini hackathons.

02 · BUILD

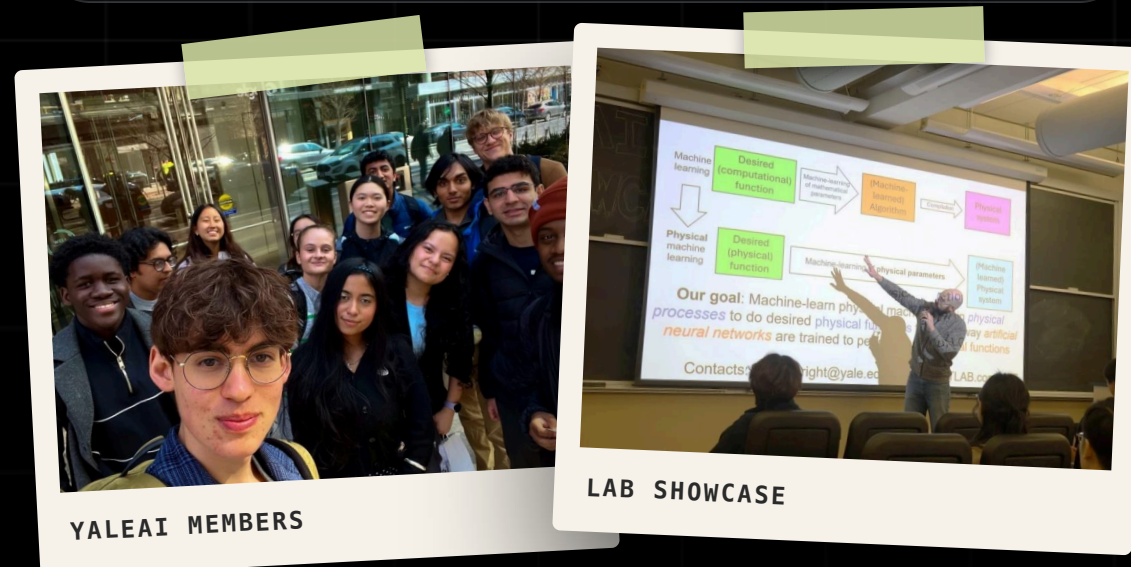

Build *real projects.*

- Project teams: YaleAI × Medicine, × Finance, × Yale. Or propose your own.
- An industry or institutional partner for every team.
- A real product, and an end-of-term demo day.

03 · COLLABORATE

Connect *with others.*

- Top companies and AI labs in NYC and Boston.
- AI-adjacent labs on campus.
- Fireside chats with founders and researchers.
- The YaleAI Symposium and club events.

MEET THE BOARD

Seven people *who build.*

Aryan Agarwal
Co-President
Cognitive Science · 2027

Addison Shea
Co-President
Physics + Energy
Studies · 2029

Hanson Qin
Treasurer
Math + CS · 2028

Filippo Fonseca
Head of Development &
 Campus Lead
MechE + EECS · 2028

David Antwi
Projects Director
EECS · 2028

Hari Viswanathan
Head of Events
Applied Math +
Philosophy · 2028

Henry Ng
Head of Sponsorships
Class of 2029

You
Fellow, project lead, builder
All majors welcome

We're the home for people who build with AI at Yale. **All builders and people interested in AI are invited. All years.** Will you join us?

Some of the things we've done *in the last year*:

LAB SHOWCASE

75 attendees, **12+** labs

Lightning talks from Yale research groups across AI, ML, robotics, and data science, with personal Q&A with the PIs.

BOSTON TRIP

All expenses *paid*

A briefing at the MIT-IBM Watson AI Lab, a social with the Harvard Undergraduate Machine Intelligence Community, and time to see the tech hub.

WORKSHOPS

Cursor @ Yale

In one demo event, attendees built portfolio websites in under an hour and walked out with Cursor Pro subscriptions.

PROJECT TEAMS

New this year: *Pick a team + ship!*

01

YaleAI × *Medicine*

02

YaleAI × *Finance*

03

YaleAI × *Yale*

For example: LLM integration in Yale websites like CourseTable.

04

YaleAI × *what you want*

Apply with a proposal!

Two ways in, applications due Friday, September 18 at 11:59 PM. Apply as a **Project Lead** with an idea (any size, any level; you need coding and AI-building experience; founders welcome, no equity taken) and we'll help make it happen and give you a team. Or apply as a **Project Developer** (coding experience required, AI experience a plus) and we'll match you to a team around medicine, finance, robotics, and more. Either way, **we'll help match your team with one of the many industry partners we're in contact with.**

and more

Applications due Friday, September 18, 11:59 PM

Questions: david.antwi@yale.edu

Learn by building something real, *with people who do this every day.*

Whatever you study and wherever you are headed, no experience required. A project team is the fastest way to go from curious to building, alongside partners who want what you make.

THE WORK

A real product *with your name on it*

Something a partner actually asked for, built with your team over the semester, and shown at demo day and the YaleAI Symposium.

THE PEOPLE

Mentors at *MIT, Jane Street, IBM, SpaceXAI*

You work with them all semester, and with a team of Yalies from every major. Collaborators first, and often friends.

AND YES

It *helps* later, too

A shipped project and a partner who knows your work are handy when internships or research come up. That part takes care of itself.

YALEAI FELLOWSHIP

Our Fall Fellowship: *Finishing with something tangible!*

A semester-long educational fellowship with a structured curriculum. Two-hour sessions, every other week, all fall.

01 • FUNDAMENTALS

Core AI and ML concepts.

02 • TOOLS

AI-native workflows and modern tooling.

03 • PRACTICE

Hands-on, collaborative coding.

04 • OUTPUTS

Every session ends with something useful.

NEXT WEEK · SAVE THE DATE

YaleAI × **PARETO** VC *dinner.*

Monday, September 15 · 6:00 to 8:00 PM. Location to be announced. Dinner with the Pareto team, for YaleAI members. **Scan to apply to attend.**

This is an example of the kind of thing you'll have access to as a YaleAI member. And we're not kidding: **Pareto Holdings is a top early-stage VC.** pareto20.com

Save the date

Apply to attend

Details in the Slack

We get you in the rooms that matter. *All paid for. :)*

SPRING TRIP

NYC / *Boston*

This year: revealed soon. Last spring it was the MIT-IBM Watson AI Lab. All expenses paid.

FIRESIDE CHATS

Top founders, *on campus*

Fireside chats with top founders we bring to campus, all in AI. We lead the conversation, you bring the questions.

YOUR AI NETWORK STARTS HERE

MIT-IBM
Watson
AI Lab

Yale

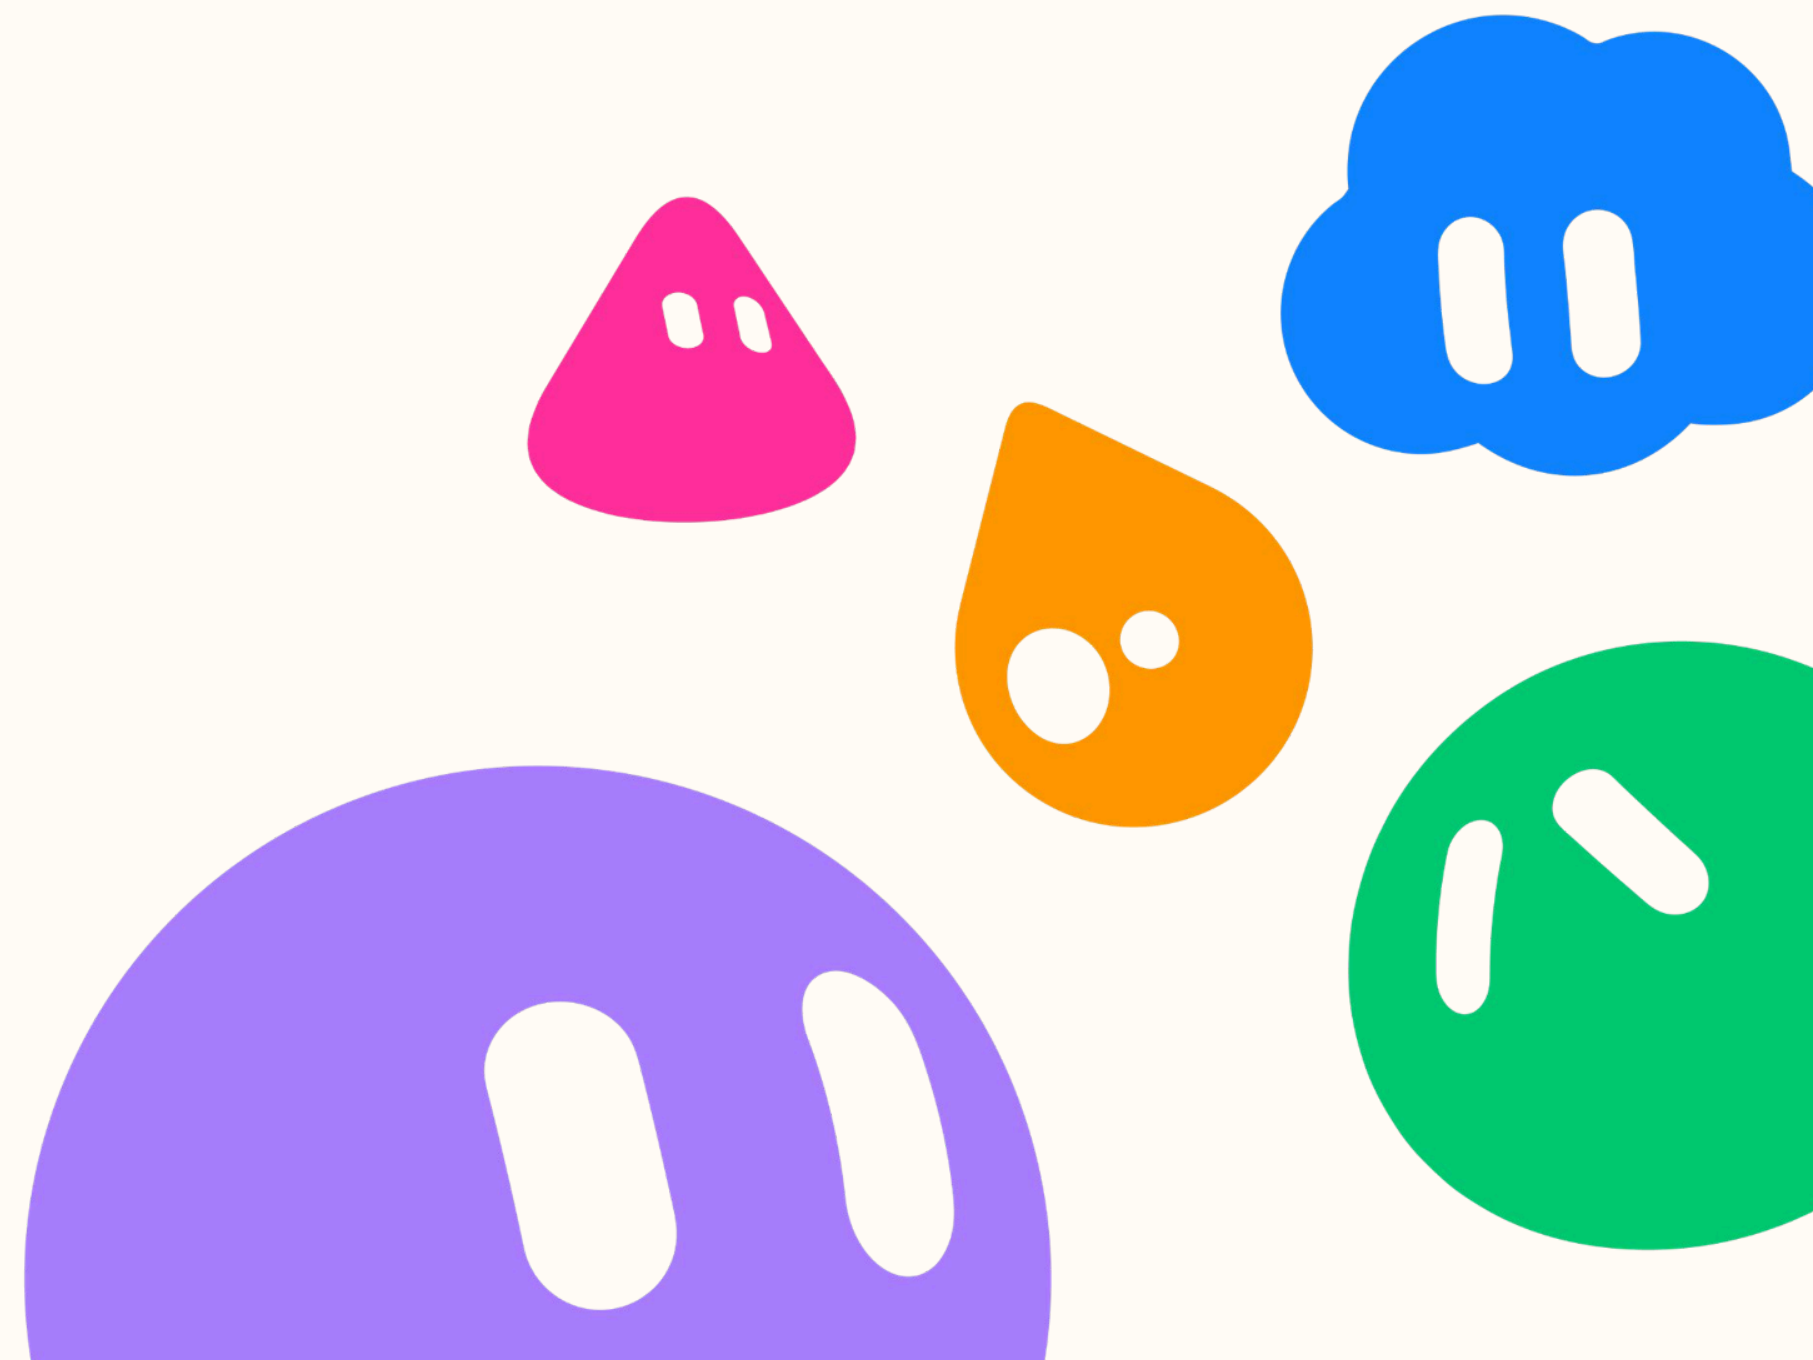

and more coming soon (top in
YALE-AI.ORG
finance, quant, AI, etc.)

Meet your new AI teammates

Agents with their own computers that get work done.
Tonight: a live demo, a month of Cursor Pro for everyone,
and a build challenge.

If you hear us say SpaceXAI, Cursor, and Grok interchangeably: **SpaceXAI acquired Cursor for \$60B this summer, Grok is SpaceXAI's frontier model**, and Grok Bot ships with Cursor Pro. One company.

Sales Outbound

Yesterday 8:52 PM

Hey Armand, good to meet you. What do you want me around for? Anything concrete, or more of a general sidekick?

Overnight pipeline generation and outbound.

Pick eligible prospects from this Google Sheet, research them on the web, grab context on contacts and accounts from Hex, Sumble, and Salesforce. Draft email and LinkedIn sequences in my voice. Check and update daily.

Created Sales Outbound routine

Checking what's connected. Hex, Gmail, and LinkedIn are already signed in. Salesforce isn't.

Computer

Working

Sign in to Salesforce so I can see the accounts you own.

Settings

Grok Bot, the launch video.

Introducing Grok Bot · SpaceXAI, August 2026 · youtu.be/F1_0Lkp16Rc

AI is evolving fast

Output

Chatbots

Answer questions, people do the work

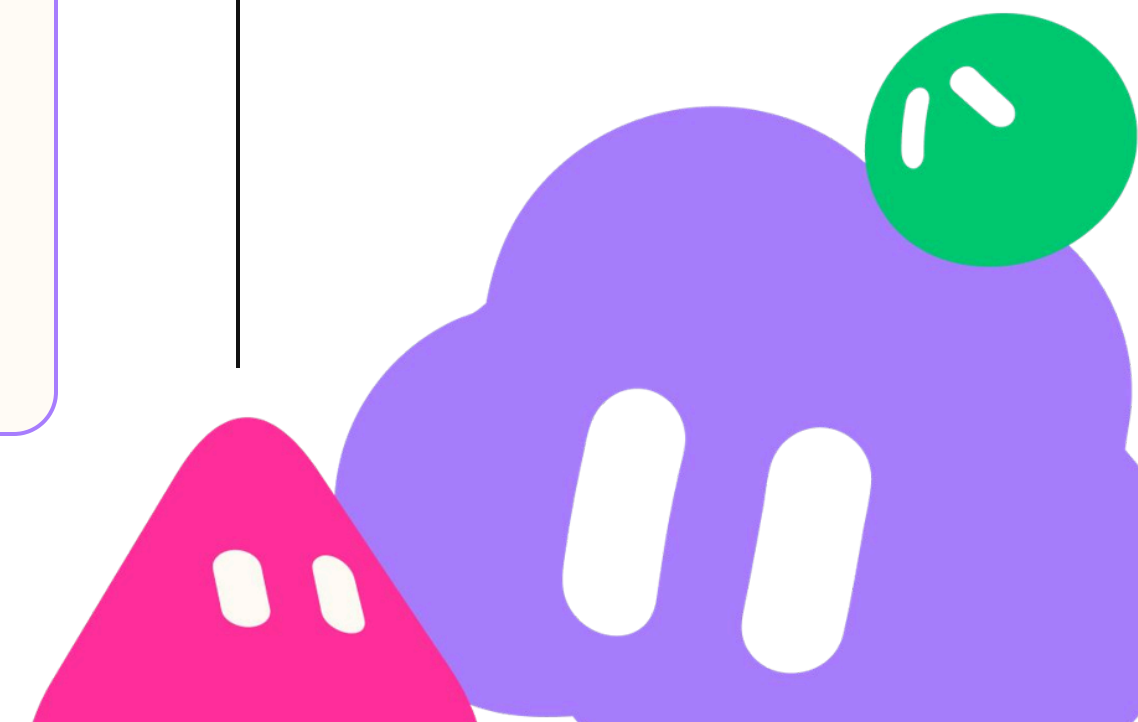

Copilots

Help with tasks, people drive every step

AI teammates

Own outcomes, start to finish.
People set direction and review

The challenge with most agents

❌ Complicated setup

```
1. # Project Instructions
2.
3. ## Code Style
4.
5. - Use TypeScript for all new files
6. - Prefer functional components in React
7. - Use snake_case for database columns
8.
9. ## Architecture
10.
11. - Follow the repository pattern
12. - Keep business logic in service layers
```

❌ Local first

Ran terminal packages

```
pnpm install
pnpm --filter web build
pnpm --filter api prisma generate
pnpm --filter api db:seed:test
```

❌ Connector limitations

	Gmail	Connected
	Slack	Unavailable
	Salesforce	Connected
	WhatsApp	Unavailable

❌ Constant monitoring

```
pnpm install && pnpm --filter web
build && pnpm --filter api prisma
generate && pnpm --filter api
db:seed:test
```

Cancel Run

❌ Painful sharing

```
/apply-notion-styleguide.md
/outbound-sales-protocol.md
/global-design-standards.md
/code-review-frontend.md
/fix-merge-conflicts-agents.md
```

Grok Bot flips every one of these.

✅ Talk to it

No config files. Tell a bot its job in plain English, like a new teammate.

✅ Its own computer

Runs in the cloud, 24/7. Nothing to install, nothing tied to your laptop.

✅ Logs into your tools

Gmail, Slack, Canvas, Sheets, the browser. It uses them like you would.

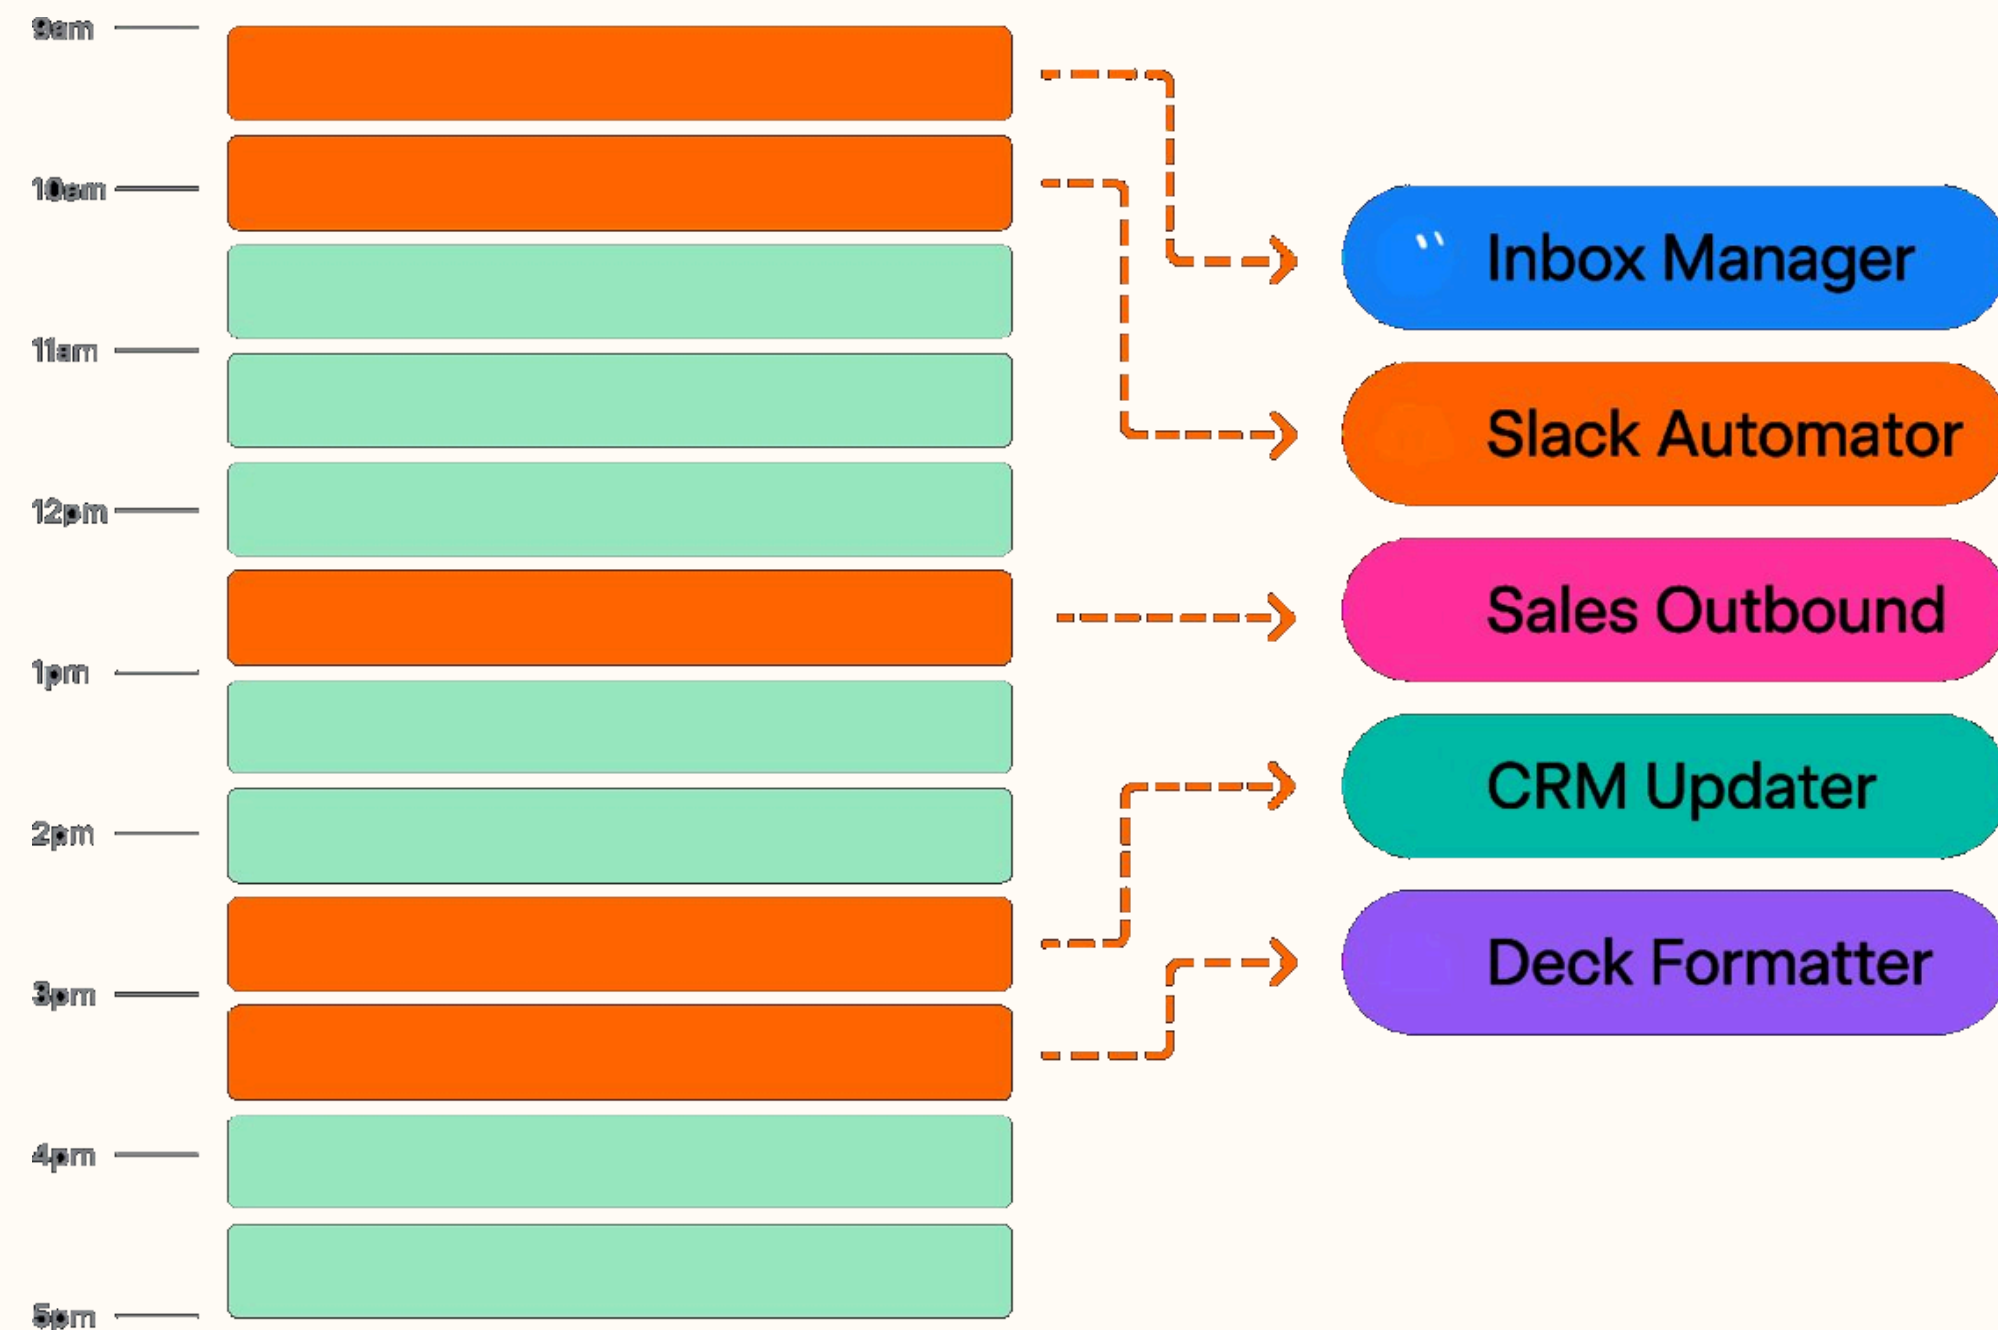

✅ Works unattended

Routines and automations. It reports back; you do not babysit it.

✅ Share it like a link

Hand your bot to a friend or your whole club in one click.

Today everyone wastes time with routine work

● High value / leverage ● Rote, repetitive work

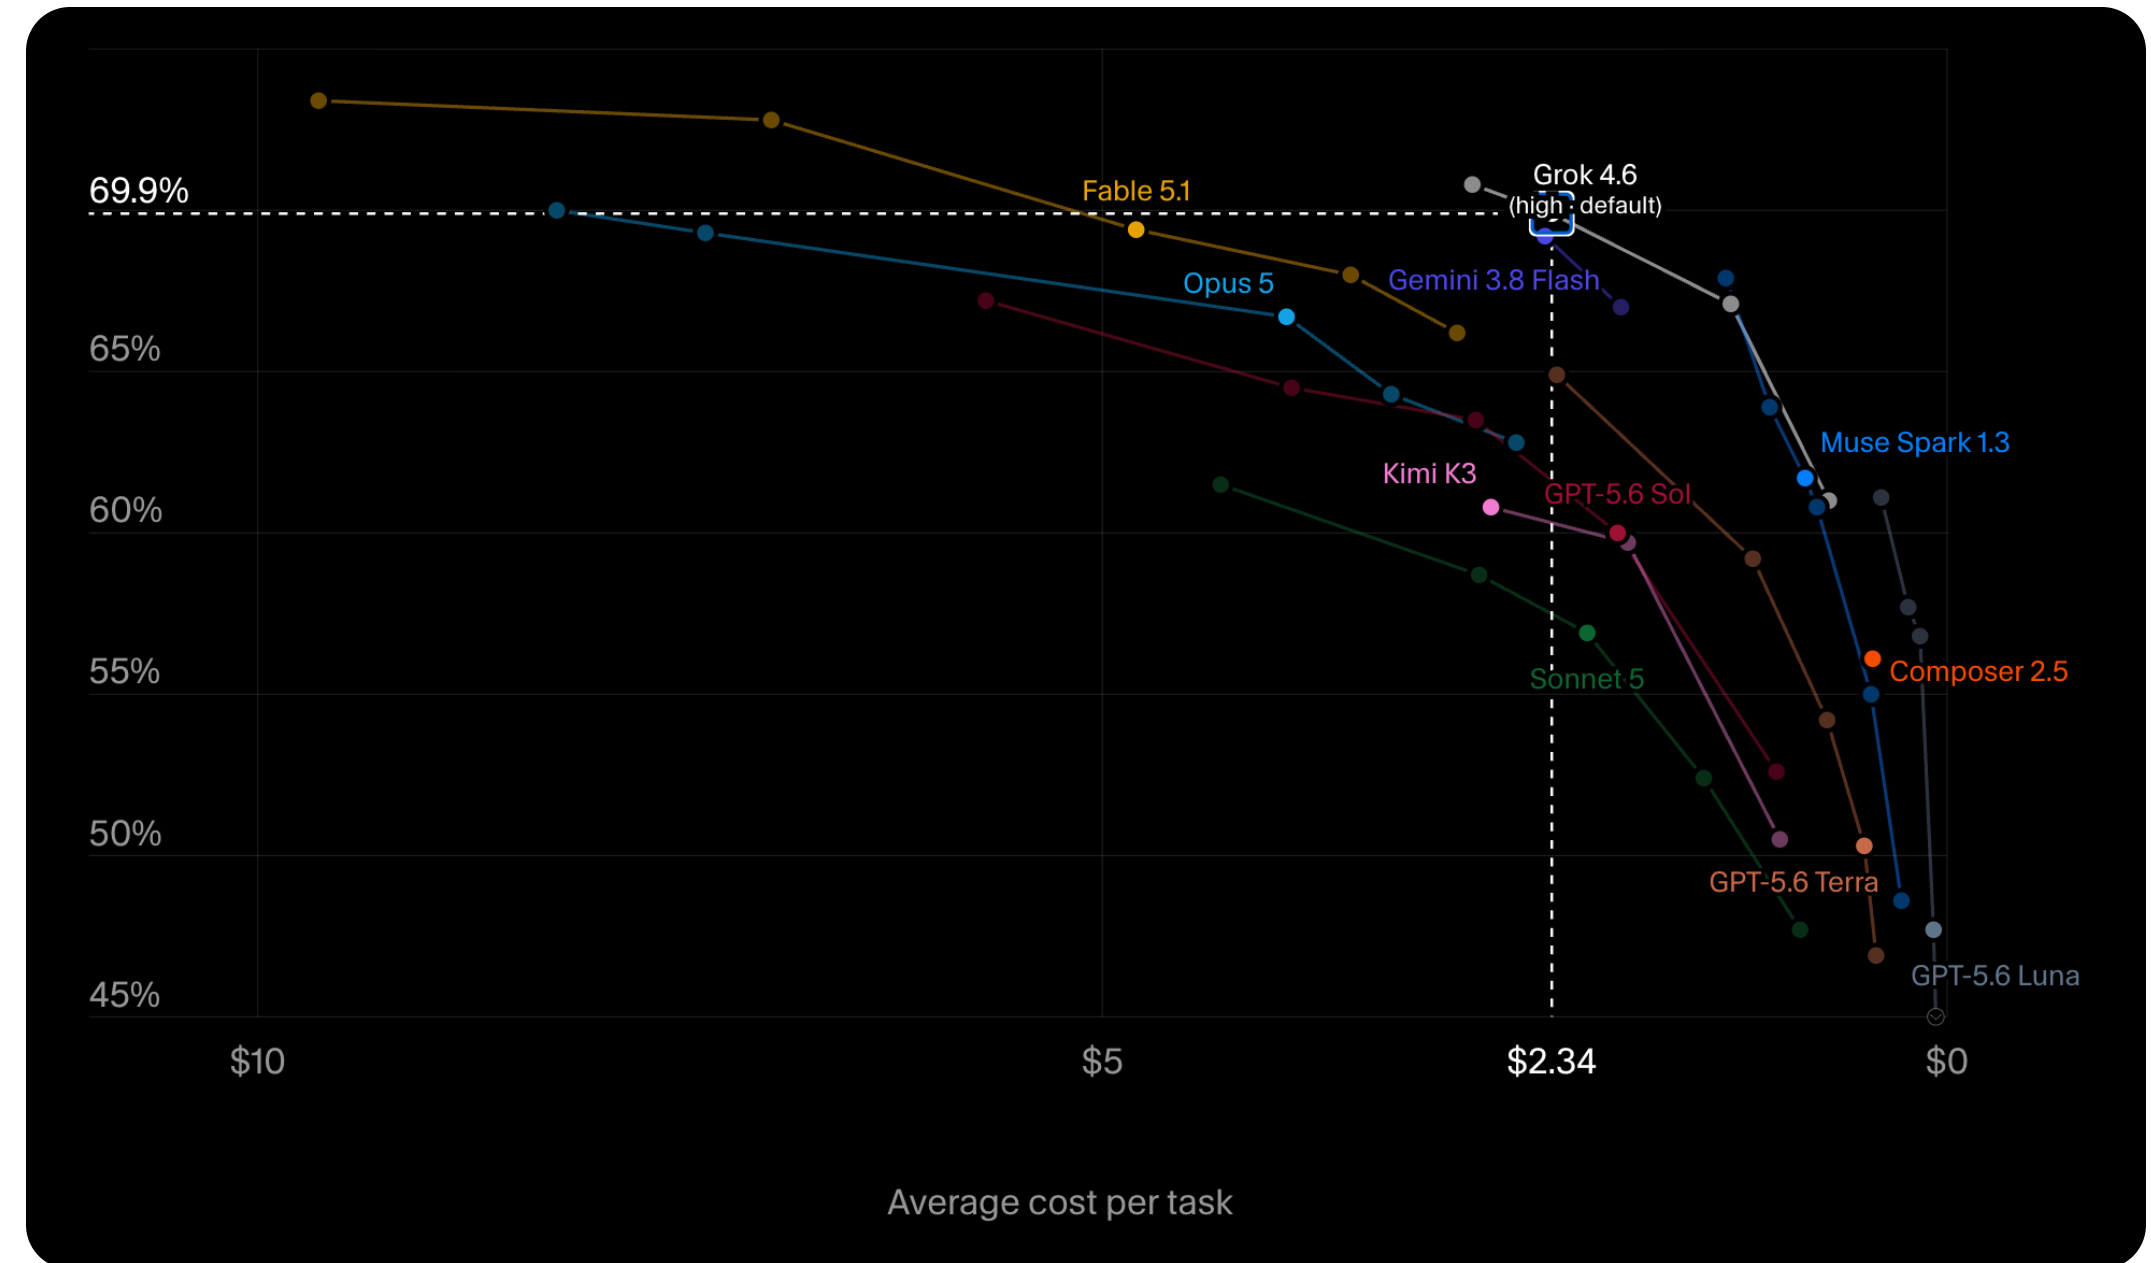

Grok 4.6: frontier accuracy, a fraction of the cost.

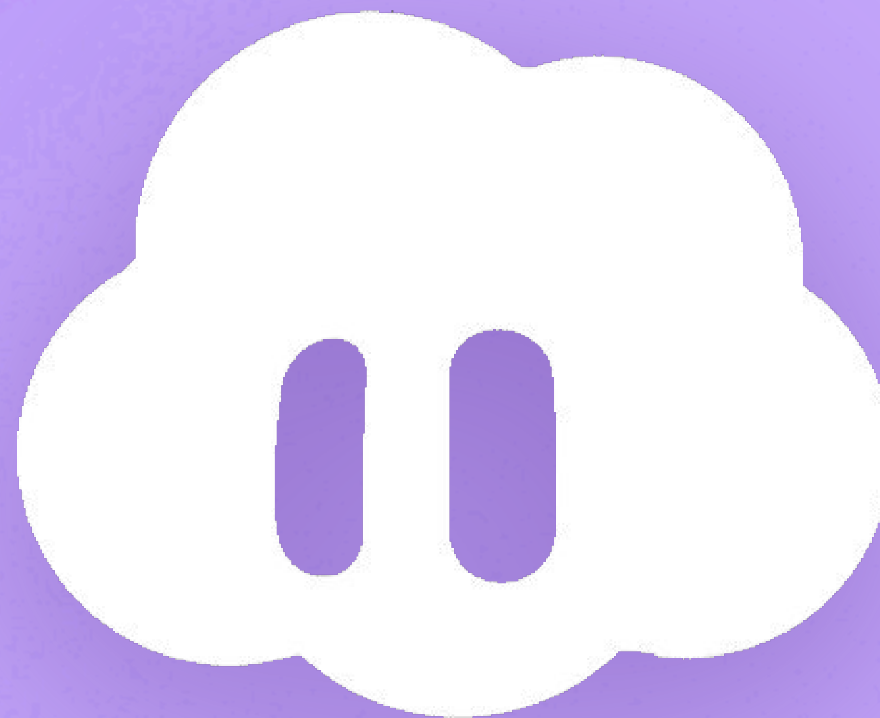

The model inside Grok Bot. **69.9% accuracy at \$2.34 a task** (Grok 4.6 high, the default): a point above Fable 5.1 at under half its cost, and clear of everything else at its price.

Accuracy against average cost per task, frontier models, September 2026.

Live Grok Bot demo

Filippo Fonseca
Head of Development, YaleAI
SpaceXAI Campus Lead @ Yale

Get **Cursor Pro.** On SpaceXAI.

Expires after this event room code · 200 redemptions

- 1 Scan the code** on the right.
It opens Cursor's redeem page for this room.
- 2 Sign in to Cursor**, or create an account.
Any email works. Your Yale one is easiest.
- 3 Claim the credit:** \$22 in Cursor credits.
Pro is \$20 a month, so that is a month of Cursor Pro. The credit is just how it is handed out.
Pro is what unlocks Grok Bot.
- 4 Open Cursor, open Grok Bot**, and start building.
Then keep going: the build challenge is next.

Do it now. The code **expires right after this event**. If you do not redeem before you leave the room, you will not get access. :)

Courtesy of **SpaceXAI**

One per person

Expires **tonight**, or when the room's **200** are gone

SCAN TO REDEEM

cursor.com/redeem/event/yale-ai-association-fall-kickoff

You have a month. Use all of it.

Cursor is the editor. Grok 4.6 is the model. Grok Bot is the teammate.

One company: **SpaceXAI acquired Cursor for \$60B this summer**, and **Grok is SpaceXAI's frontier model**. The whole suite is unlocked tonight. Pick one real thing you are already doing this week and hand it over.

CURSOR

Write your psets, your side project, your club's website **in Cursor**. Tab, agent mode, the works. Pro is the full experience.

GROK 4.6

Set it as your model in Cursor. **Frontier accuracy**, cheap enough to leave running on the long tasks.

GROK BOT

Give a bot a job: inbox triage, meeting notes, a research digest, your recruiting tracker. **It has its own computer**. Let it work.

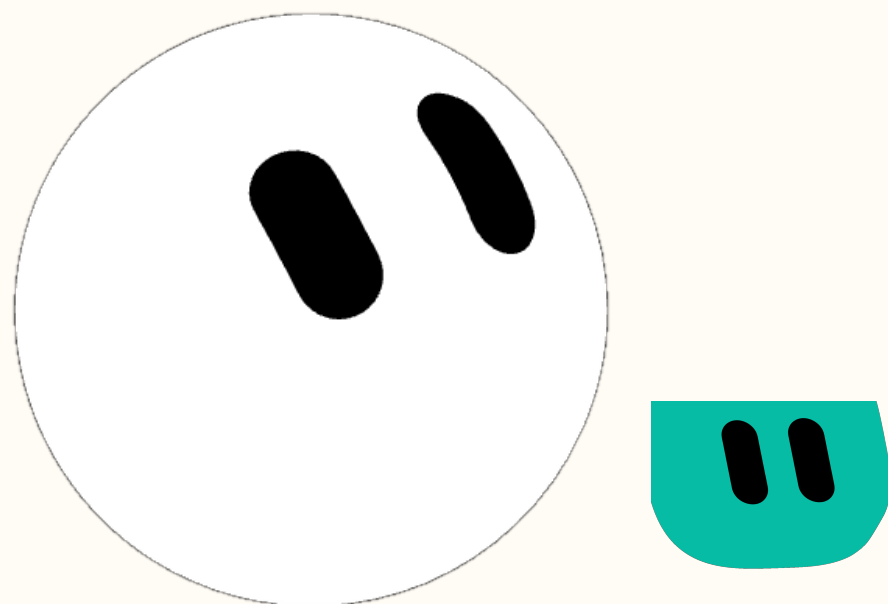

THE COMPETITION

Rapid-fire Cursor.

How quickly can you build a web app for Yale students?

Start right now, here in the room, with the Cursor Pro you just redeemed, and finish by Friday night. **Useful beats flashy.** The three best builds each win **three months of Cursor.**

● **Competition** starts now · ends Friday at midnight

THE BRIEF

A **useful web app** for Yale students, built in Cursor. Classes, clubs, dining, schedules, recruiting, research, anything you actually wish existed.

THE README

A **screenshot of you building it in Cursor, usage instructions** (logins, test accounts, whatever we need to run it), and a **public link to a 1 to 2 minute demo video** in the README (YouTube, Google Drive, anywhere). Solo or a team of up to three.

SUBMIT

The **GitHub link** at yale-ai.org/win by **Friday, September 11, 11:59 PM**. Set the repo to **public**.

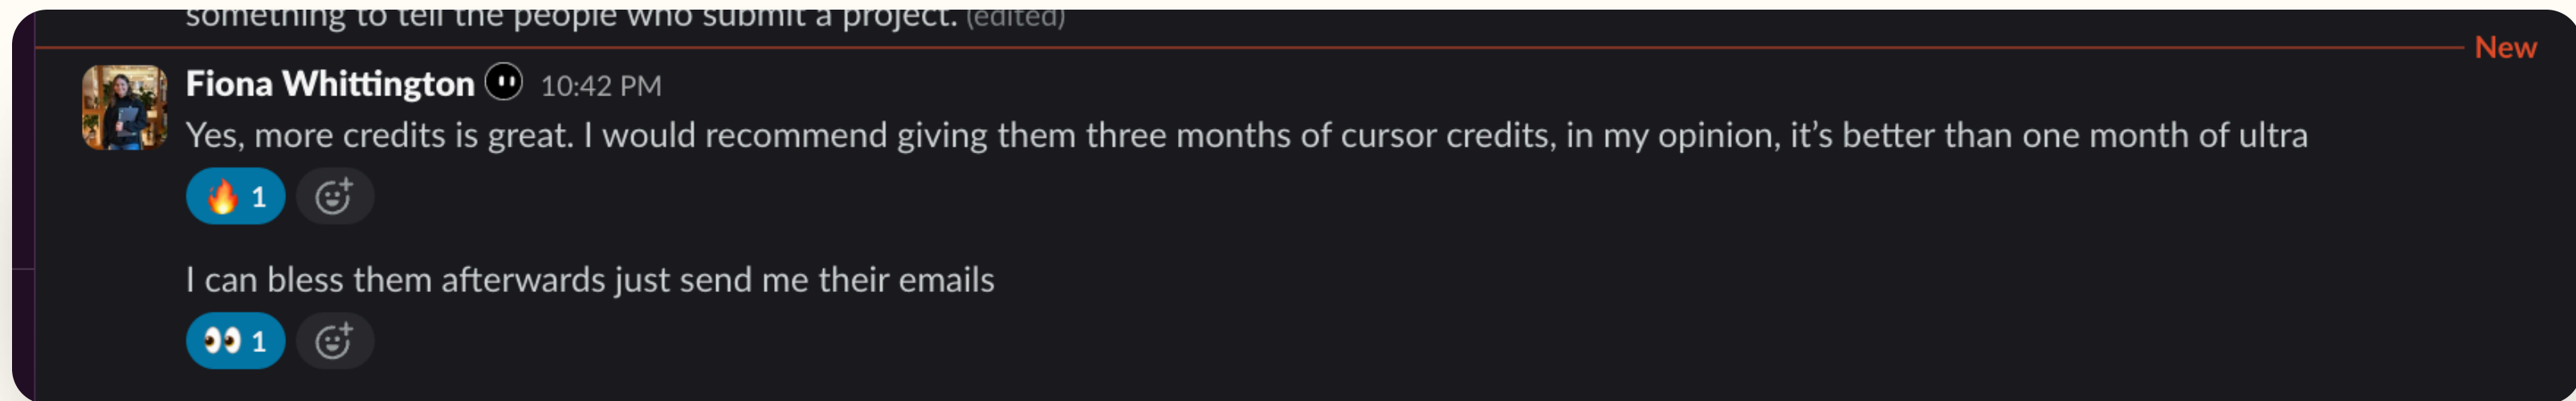

Everything on this slide:
yale-ai.org/competition

PRIZES

Three winners, each with **three months of Cursor** from SpaceXAI. Judged on usefulness, craft, and speed. **Winners get an email** within a few days.

Three winners. Three months of Cursor each.

We asked SpaceXAI whether they could do a little more for the winners. This was the reply, a few minutes later. That is what it looks like when a company actually backs the Yale builder community.

Fiona Whittington, community at SpaceXAI, on Slack the night before the kickoff.

Submit at
yale-ai.org/win

Deadline: Friday, September 11, 11:59 PM

THE FORM ASKS FOR

- Your name and Yale email
- The **GitHub link**, repo set to **public**
- One sentence on what it does

THE README NEEDS

- A screenshot of you **building it in Cursor**
- **Usage instructions** (logins, test accounts, etc.)
- A public link to a **1 to 2 minute demo video** (YouTube, Google Drive, anywhere)

FOR NOW

- We send this link out again **tomorrow during the day**. Deadline is **Friday night**.
- Get cracking: set up the repo, use that new **Cursor Pro**
- **Winners hear from us by email** within a few days

● **Deadline** Friday, September 11 · 11:59 PM

SCAN TO SUBMIT

yale-ai.org/win

Something exciting for us: *tonight was just the start for YaleAI... :)*

TONIGHT

A month of *Cursor Pro*

Redeemed in this room, on
SpaceXAI. Grok Bot unlocked.

THIS WEEK

Ship the *app*

Submit by Friday at midnight.
Three winners get three months
of Cursor from SpaceXAI.

THIS YEAR

Everything *else*

The fellowship, project teams
with top partners, workshops
every other week, fireside chats,
the trips, the symposium. And
more SpaceXAI credits for
people who keep building with
us.

Everything from tonight, *in one place.*

yale-ai.org/slack

Join the Slack. That is how you become a member. Free, no application.

yale-ai.org/competition

Rapid-fire Cursor: the rules, the prizes, and the form.

yale-ai.org/win

Submit your GitHub link. Friday, September 11, 11:59 PM.

cursor.com/redeem/event/yale-ai-association-fall-kickoff

Your month of Cursor Pro from SpaceXAI. Expires right after this event, so redeem before you leave.

yale-ai.org/apply

Project teams: apply as a Project Lead or a Project Developer by Friday, September 18, 11:59 PM.

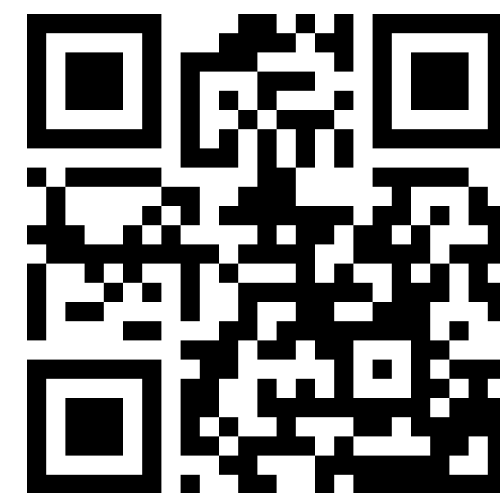

yale-ai.org/pareto

Apply for the YaleAI x Pareto VC dinner, Monday, September 15.

yale-ai.org/deck

SLACK

SUBMIT

REDEEM CURSOR PRO

APPLY TO A TEAM

ALMOST DONE

Okay. Now we just need *two things*
from you
to kick off YaleAI's 2026-27.

01

A *group photo*

Everyone in it. Yes, everyone. :)

02

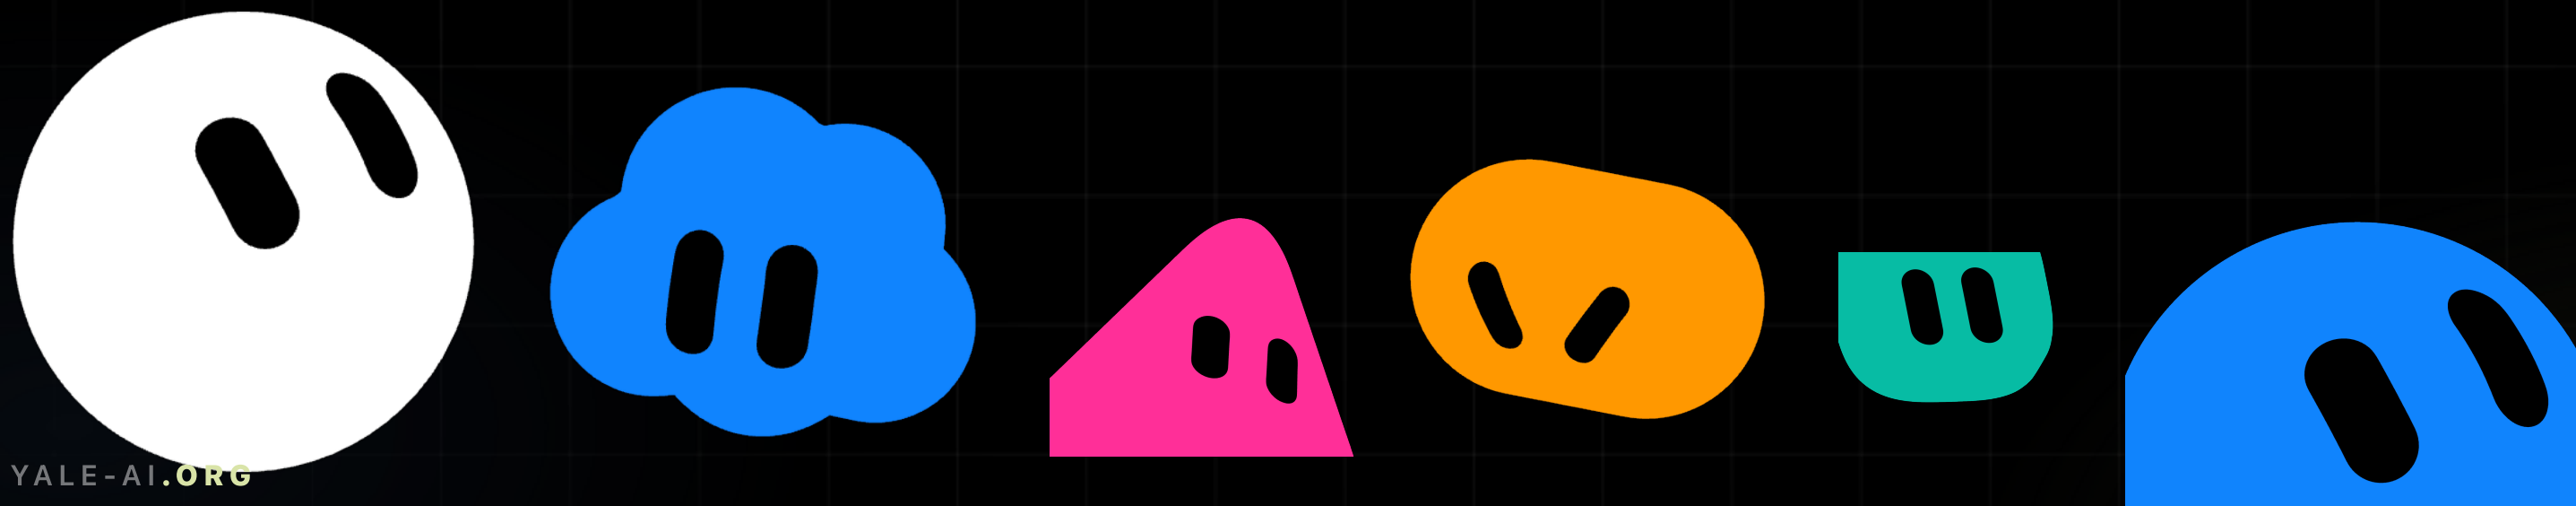

Scan the QR and *join the Slack*

This is how you become an official member, get invited to things, and get sent free stuff!

THING ONE

 Group *photo.*

THING TWO • NOW GO BUILD!

Join the *Slack*. :)

If you want more perks like this, access to the **fellowship, project teams, workshops, trips, and speaker events**, and to learn how to get involved with AI at Yale, **join the Slack**. No application, no selection, and it's free. All majors welcome.
