

Perplexity @ Yale | In Collaboration with YaleAI

Perplexity is hiring exceptional Yale students for **Member of Technical Staff** positions in 2026-2027. Talented technologists with any of the following interests are invited to apply:

- **Applied research** (agent harnesses, orchestration, continual learning, RL envs, and more)
- **Full-stack, backend, and platform engineering** across Perplexity's product portfolio
- **AI infrastructure** (agent runtimes, cloud infra, training/inference systems, and more)
- **Any other technical field** relevant to building frontier intelligence systems

Roles are fluid at Perplexity. Our team is laser-focused on advancing the AI frontier and building category-defining products. Perplexity's most impactful team members routinely contribute across areas to make this happen.

Our new grads enjoy base salaries of over \$200,000, along with generous equity and benefits.

Although our focus is on students in their final year of study, those interested in taking an indefinite leave of absence starting within the next year are also welcome to apply.

Tech Talk & Coding Contest: September 21

6:30-9:00 PM (Tsai CITY)

Prizes include Perplexity Max, API Platform credits, and automatic final-round interviews!

On-Campus Interviews: September 21-22

Apply at pplx.ai/2026Yale (OCI deadline: September 20 @ noon)
